In this article, we'll take a closer look at the geography of Saudi Arabia and uncover its hidden gems. From towering mountains to pristine beaches and everything in between, there's more to Saudi Arabia than meets the eye.

Mountains

While Saudi Arabia is often associated with flat, sandy terrain, it's also home to some impressive mountain ranges. The Hijaz Mountains, located in the western part of the country, form a natural barrier between Saudi Arabia and Jordan. These mountains are home to some of the highest peaks in the country, including Mount Sawda, which stands at over 3,000 meters (9,800 feet) tall.

The Sarawat Mountains, located in the southwestern part of the country, are another major mountain range in Saudi Arabia. These mountains are home to some of the country's most popular tourist destinations, including the city of Abha and the Al Soudah mountain resort.

Beaches

Saudi Arabia has a long coastline along the Red Sea and the Persian Gulf. The Red Sea coast is home to some of the country's most beautiful beaches, including the white-sand beaches of Sharm Obhur and the turquoise waters of Farasan Island.

The Persian Gulf coast is also home to some beautiful beaches, including the white-sand beaches of Jubail and the black-sand beaches of Ras Tanura.

Deserts

Of course, no discussion of Saudi Arabia's geography would be complete without mentioning its deserts. The vast majority of the country is covered by desert, including the Rub' al Khali, one of the largest deserts in the world.

While the desert can be a harsh and unforgiving environment, it's also home to some of the country's most iconic landmarks, including the Empty Quarter and the Harrat Khaybar lava fields.

Other Natural Features

In addition to its mountains, beaches, and deserts, Saudi Arabia is home to a variety of other natural features, including:

- **Wadis:** These seasonal rivers are often dry during the summer months but can become raging torrents during the rainy season.
- **Oases:** These lush, fertile areas are often found in the middle of the desert and are a welcome sight for travelers.
- **Salt flats:** These vast, flat areas of salt are found in the Rub' al Khali desert and are a popular tourist destination.
- **Volcanoes:** Saudi Arabia is home to several volcanoes, including the Harrat Khaybar lava fields and the Jabal al Lawz shield volcano.

Saudi Arabia is a vast and diverse country with a lot to offer visitors. From towering mountains to pristine beaches and everything in between, there's more to Saudi Arabia than just sand. So if you're looking for a new and exciting travel destination, be sure to add Saudi Arabia to your list.
