Pateman traces the historical development of the public/private divide, showing how it has been used to justify the subordination of women. In the pre-modern era, women were confined to the private sphere of the household, while men dominated the public sphere of politics and economics. This division of labor was based on the assumption that women were naturally suited to domestic tasks, while men were better equipped for public life.

With the rise of industrial capitalism, the public/private divide became even more pronounced. Women were increasingly excluded from the workforce and relegated to the role of unpaid caregivers. This further entrenched the idea that women's place was in the home, while men's place was in the world.

Pateman argues that the public/private divide has had a devastating impact on women's lives. It has limited their opportunities for education, employment, and political participation. It has also made them more vulnerable to violence and abuse.

Pateman's work has been instrumental in challenging the public/private divide and in bringing the personal into the realm of the political. She has shown that the personal is not simply a private matter, but a political issue that has a profound impact on women's lives. Her work has helped to pave the way for a more just and equitable society for all.
